Case Studies of How Data Science is Being Applied in Higher Education

Wednesday, November 6, 2019

3:30 pm – 4:30 pm – Purvis Hall, 1020 Pine Ave. West, Room 24

All are Welcome

Abstract:

This talk will be a an informal walk-through of two different Data Science projects that are in production right now in the Higher Education space; the first is for administrators, while the second one is being used in classrooms every day. We will discuss common themes and lessons learned from these efforts to bring data to the forefront of decision-making.
