

WINTER 2020 Biostatistics Seminars

January 8, 2020	Michael Wallace	<u><i>Measurement Error and Precision Medicine</i></u>
January 15, 2020	Michele Santacatterina	<u><i>Kernel Optimal Orthogonality Weighting: A Balancing Approach to Estimating Effects of Continuous Treatments</i></u>
January 22, 2020	Juliana Schulz	<u><i>Doubly Robust Estimation of Optimal Dosing Strategies</i></u>
NO BIOS Seminar January 29, 2020	<u>REPLACED</u> <u>FRIDAY JAN 31</u> Ana-Maria Staicu <u>CRM Coloque at</u> <u>HEC</u>	<u><i>Longitudinal Functional Regression: Tests of Significance</i></u>
February 5, 2020	Timothy Evans	<u><i>Harnessing AI for Global Health: Opportunities and Obstacles</i></u>
February 12, 2020	Denis Talbot	<u><i>Confounding Adjustment for Multi-Level Treatment Comparisons under Lack of Positivity and Unknown Model Specification</i></u>
February 19, 2020	David Campbell	<u><i>Overcoming Statistical Challenges from Multimodal Likelihoods</i></u>
February 26, 2020	Genviève Lefebvre	<u><i>Comparing Logistic and Log-Binomial Models for Causal Mediation Analyses of Binary Mediators and Rare Binary Outcomes: Moving Towards Exact Regression-Based Approaches</i></u>
March 4, 2020	NO SEMINAR - READING WEEK	
March 11, 2020	Paramita Saha Chaudhuri	<u><i>Monitoring with Repeatedly Measured Marker: Assessing Incremental Value of Additional Measurements</i></u>
