

Winter 2017 Bios Seminars

Date	Speaker	Title
January 10, 2017	Thomas A. Murray **Special Seminar**	Robust treatment comparison based on utilities of semi-competing risks in non small cell lung cancer - pdf
Special Date Jan. 12, 2017	Jon A. Steingrimsson **Special Seminar**	Doubly Robust Survival Trees and Forests - pdf
Jan. 17, 2017	Brian Caffo	Am I My Connectome? Fingerprinting With Repeated Resting State Functional MRI Data - pdf
Special Date Jan. 20, 2017	Nandini Dendukuri **Special Seminar**	Latent class analysis: An indispensable tool for diagnostic research - pdf
Jan. 24, 2017	Matey N. Neykov **Special Seminar**	High Dimensions, Inference and Combinatorics. A Journey Through the Data Jungle - pdf
Jan. 31, 2017	Rob Deardon	Inferring the spatial dynamics of infectious diseases via Gaussian process emulation - pdf
Feb. 7, 2017	Suchi Saria	Scalable Joint Models for Reliable Event Prediction: Application to Monitoring Adverse Events using Electronic Health Record Data - pdf
Feb. 14, 2017	NO SEMINAR	
Feb. 21, 2017	Bohdana Ratitch	Current trends and open questions in dealing with treatment non-adherence and missing data in the clinical trials regulatory environment - pdf
Feb. 28, 2017	NO SEMINAR - STUDY WEEK	
Mar. 7, 2017	Azadeh Shohoudi	A Bayesian mixture model for Atrial Fibrillation recurrence following Cryoablation balloon procedure - pdf
Mar. 14, 2017	Coraline Danieli	New tests to check the main assumptions of a flexible parametric excess hazard model - pdf
Mar. 21, 2017	Hilary Parker CANSSI Distinguished Visitor	Data Science at Stitch Fix - pdf
Mar. 28, 2017	Ruth Pfeiffer	An efficient procedure to combine biomarkers with limits of detection for risk prediction - pdf
