Confirmation of Supervision Form

The completed form and the research project proposal must be sent as an attachment to experimental.medicine@mcgill.ca.

A student cannot enter the program until a commitment of financial support is obtained from (a) a supervisor willing to financially support the student, or (b) a fellowship/scholarship/studentship from an agency (e.g. CIHR, NSERC, etc.), or (c) a foreign government body who awards a scholarship for study abroad. A commitment of financial support is therefore a prerequisite for admission and the funding source, duration and amount must be clearly indicated. The Division does not accept self-funded students.

The Faculty of Medicine and Health Sciences has implemented a new Harmonized Stipend Policy starting Fall 2022. The minimum annual stipend for the 2022-2023 year for MSc and PhD students*:

\$20,000 base living allowance + tuition and student fees

*Exceptions: (1) MSc Bioethics students do not receive a stipend. (2) MSc DHI students do not receive a stipend in their first 2 semesters of study when they are taking courses full time. Stipends for DHI students begin in May of their first year of studies.

For complete details about the Division's stipend policy, including required top-ups for external awards and maximum stipend amounts, please refer to our website: <u>https://www.mcgill.ca/expmed/funding-and-awards</u>

Tuition & Student Fees:

Tuition and student fees can be calculated by checking the university website: <u>https://www.mcgill.ca/student-accounts/tuition-charges/fallwinter-term-tuition-and-fees/graduate-fees</u>

Note, International MSc and PhD students and Out-of-Province MSc students pay higher tuition during their terms of residency (MSc, for 3 terms, PhD until end of PhD Y4). After this time, tuition is reduced to the Quebec student rate.

Part 1 (to be completed by the applicant)
