

# Vision, Mission *and Values*

## Vision:

---

A global leader in family medicine that creates healthier communities through exceptional education, research and patient care.

## Mission:

---

McGill's Department of Family Medicine **advances the primary care of the population** in Quebec, Canada, and around the world. We achieve this as a community of exceptional primary healthcare professionals, researchers, students and support staff who are dedicated to:

- delivering effective **patient-centred care** and **advocating** for vulnerable populations and communities
- **educating** learners in an **inclusive, bilingual and interprofessional environment**
- **leading excellence in research** and scholarly activities
- **promoting sustainability** in healthcare systems and **innovation** in curriculum and clinical practice
- engaging in **international and global health** activities

## Values:

---

In pursuit of exceptional education, research and patient care, we are guided by the following values:

- Respect and collaboration
- Equity, diversity and inclusion
- Sustainability
- Integrity
- Compassion and empathy
- Humility
