

MCGILL FAMILY MEDICINE RESEARCH SEMINARS

“INTERPRETATION AND TRANSLATION OF STUDY RESULTS: LIMITATIONS & POTENTIALS OF CONFIDENCE AND PREDICTION INTERVALS”

Dr. Tibor Schuster

Dr. Schuster has academic background and professional experience in biostatistics and pharmacoepidemiology. He received his PhD in statistics at the Ludwig Maximilians University of Munich, Germany and worked as a statistical consultant at the Medical Faculty of the Technische Universitaet Muenchen, Munich. He was a Postdoctoral Fellow at the Department of Epidemiology, Biostatistics and Occupational Health at McGill University. Dr. Schuster taught biostatistical methods at the Technische Universitaet Muenchen, Munich and was course lecturer for advanced causal inference methods at McGill University. He acted as supervisor and mentor for graduate and doctoral students in the field of biostatistics, epidemiology and clinical research. Throughout his career, he worked as a statistical consultant in a wide variety of medical areas which led to a large number of successful international collaborations. He is currently the clinical epidemiology and biostatistics unit (CEBU) and the new Melbourne Children’s Trials Centre (MCTC) in the role of a research fellow and senior biostatistician.

Thursday September 24, 2015
