

**STUDENT PAGE**

**Name** Ozlem (Izzie) Barin

**Program** PhD in Family Medicine and Primary Care, Faculty of Medicine and Health Sciences, McGill University

**Thesis title** TBD  
*Thesis Advisory Committee:* Charo Rodríguez (Principal Supervisor), Tibor Schuster (Co-Supervisor), TBD (Advisors)

**Expected date of graduation** October 2024

**Short biography** Izzie is a 1st year PhD student at McGill University, Department of Family Medicine and Primary Care. She is interested in using the mixed-methods approach in medical education research and randomized controlled trials. Prior to the PhD program, she worked at the Harvard Medical School as a Research Assistant, working on a randomized control trial studying the effects of employer-provided educational wellness programs on health. She received an MA degree in Economics from the University of New Mexico (UNM). During the master's program, she was a fellow at the UNM Evaluation Lab, serving as a clinical program evaluator and a health science research specialist. She grew up in Turkey and in 2007, moved to the United States as a Fulbright Scholar. Then received a BS degree in Economics with a minor in Mathematics from Minnesota State University.
