

# MCGILL FAMILY MEDICINE RESEARCH SEMINARS

## “HIV AND WOMEN: PREVENTION AND CARE IN SOUTHERN AFRICA AND CANADA”

David Loutfi & Nadia O'Brien

David Loutfi is a PhD student in the Department of Family Medicine at McGill University. His research on HIV prevention in Botswana focuses on understanding the social networks of vulnerable young women to improve their access to structural support programs. He will be presenting his proposed research alongside preliminary results from a pilot study.

Nadia O'Brien is a PhD student in the Department of Family Medicine at McGill University. Her research aims to engage patients and providers in describing gaps in care and in co-designing care recommendations to improve primary care for women with HIV in Canada. To conduct this research she works with the Canadian HIV Women's Sexual and Reproductive Health Cohort Study (CHIWOS). She will be presenting her proposed research, as well as some findings from focus groups with women with HIV.

Thursday December 15, 2016  
From 12:30-2:00 p.m.  
Department of Family Medicine  
5858 ch. de la Côte-des-Neiges, 3rd floor, suite 300
