DEPARTMENT OF FAMILY MEDICINE SUMMER SESSION 2016

The Research and Graduate Programs Division of the Department of Family Medicine is proud to present its official summer session for May and June. We offer training for patient-oriented, community-based research with innovative methodologies. The expertise of our teaching faculty crosses conventional discipline boundaries and research traditions.

The courses in this session incorporate an interdisciplinary perspective with rigorous training in qualitative, quantitative, mixed methods and participatory research approaches with topics ranging from program evaluation to understanding the health care system. Graduate students, health professionals and others are welcome to register for these courses for either professional interest or credit.

COURSES

All courses are 1-credit (15 in-class hours) offered online or in the class spaces of the Department of Family Medicine at 5858 Cote-des-Neiges, Suite 300, in Montreal, Quebec.

FMED603 PARTICIPATORY RESEARCH: PATIENT AND PARTNER ENGAGEMENT

May 2 – May 26 | Offered online with virtual meetings scheduled as needed

Instructor: Jonathan Salsberg, Associate Director, Participatory Research at McGill

Participatory research integrates the translation of knowledge into practice by generating evidence that emanates from the setting or practice where it will ultimately be applied, making it much more relevant to end-users. This introductory course will follow the Canadian Institutes of Health Research Guide to Researcher and Knowledge-User Collaboration in Health Research, with a particular emphasis on primary care and community health.

FMED500 INTRODUCTION TO RESEARCH AND SCHOLARLY ACTIVITY

May 30 – June 23 | Offered online with virtual meetings scheduled as needed

Instructors: Jeannie Haggerty, Associate Professor; Isabelle Vedel, Public Health Physician, Assistant Professor; Tamara Carver, Postdoctoral Fellow; Jeff Nachtigall, Artist

An introduction to the concepts needed for developing a protocol for modest research or scholarly activity in primary health care. Topics include development of a research question, how to conduct a preliminary search of the literature, use of reference software, key methodological considerations in the most common types of scholarly activity: chart reviews, surveys, literature reviews, exploratory interviews, and artistic inquiry.

FMED600 MIXED STUDIES REVIEWS

May 2 – June 23 | Offered online | In-person meetings on Tues Jun 7 1:30-4:30; Wed June 22 9:30-12:30

Instructors: Pierre Pluye, Professor; Isabelle Vedel, Public Health Physician, Assistant Professor

As a result of taking this course, participants should be able to (1) distinguish mixed studies reviews from literature reviews of quantitative studies and from those of qualitative studies, (2) review publications reporting quantitative, qualitative and mixed methods studies, and (3) write proposals for mixed studies review projects.

FMED607 INTRODUCTION TO DISCOURSE ANALYSIS & INTERPRETIVE HEALTH RESEARCH

May 30 – June 3 | Mon – Fri | 9:30-12:30

Instructors: Charo Rodriguez, Associate Professor; Emmanuelle Bélanger, Assistant Professor, University of Montreal; Nathalie Dinh, Adjunct Professor, Psychiatry; Richard Hovey, Associate Professor, Faculty of Dentistry

An introduction to interpretive and critical qualitative methodologies in health research. The main learning objective is to become familiar with the theoretical underpinnings and methodological practice of important discourse analysis and interpretive approaches in health research.

FMED612 PROGRAM EVALUATION & IMPLEMENTATION SCIENCE

May 2 – May 13 | Mon Wed May 2, 4; Mon Wed Fri May 9, 11, 13 | 9:30-12:30

Instructors: Isabelle Vedel, Public Health Physician, Assistant Professor

This course will enable students to critically appraise available evidence and be familiar with methods and issues specific to intervention implementation and program evaluation in the context of family medicine practice. The main objective is to produce an evaluation protocol for a specific program that responds to the expectations of clinicians-managers in primary care.

FMED611 HEALTH CARE SYSTEMS AND PRIMARY CARE REFORM

June 6 – June 10 | Mon – Fri | 9:30-12:30

Instructors: David Levine, Adjunct Professor; Howard Bergman, Chair; Charo Rodriguez, Associate Professor; Gillian Bartlett, Associate Professor

The course is intended to provide students with an overview of different health care systems around the world and with a detailed understanding of the Quebec primary health care systems including past and present reforms. The course will help students situate their research within the complexities of the health care system.

FMED605 CANADIAN HEALTHCARE POLICY AND DECISION-MAKING

May 16 – May 26 | Mon Wed Fri May 16, 18, 20; Tues Thurs May 24, 26 | 9:30-12:30

Instructor: Susan Law, Associate Professor

The focus of the course is on practical tools related to policy development and analysis such as sources of evidence for policy and writing for decision makers. Topics include healthcare policy in Canada, including an overview of the Canadian healthcare system, theoretical frameworks for policy analysis and priority-setting, knowledge transfer, and change management.

FMED618 TOPICS IN PHARMACOECONOMICS, DRUG SAFETY AND POLICY

June 13 – June 17 | Mon – Fri | 9:30-12:30

Instructor: Mabelle Wilchesky, Assistant Professor

This course will cover topics pertaining to the pharmaceutical industry, the drug development process, the Canadian regulatory process, research to evaluate drug safety and effectiveness, principles of pharmacoeconomics and methods used to value pharmacotherapy in the context of family medicine.
