Additional Notes:

When correcting a prior year expense:

- Do not enter the 7xxxxx account code used in the original transaction for the credit or the debit sequences. Enter the equivalent account code which begins with **87xxxx**. Normally, the last four digits of the account code will be an exact match.
- Always verify the 87xxxx account code by consulting the Banner form FTVACCT or log in to Minerva > Finance (Fund) Administration Menu > Public FOAPAL Hierarchy Reports and consult FZRG0022B – Valid Accounts Hierarchy Report.

Example:

Prior year transaction account code (used in the original transaction)	Account code to use in the debit and credit sequence of the JE16
700001	870001
700686	870027 In this case, 870686 is not a valid account code. When you consult FZRG0022B – Valid Accounts Hierarchy Report in Minerva, you can see that account code 700686 rolls up to 70027. If you search for 870027, the account code exists. Therefore, in the absence of a perfect match, this account code should be used in both the debit and the credit sequences
