

Discounted IDT pricing for the Goodman Cancer Research Center

FREE SHIPPING ON ALL ORDERS*

- No minimum purchase required
- No brokerage or import fees
- Rapid delivery
 - FedEx Priority Morning Delivery
 - Order early and get your 25 nmol desalted oligos the next business day

* Excludes shipments containing plate products and 1 L buffers. Enquire for details.
Consolidated shipment to GCRC Biobar room 612
Free Shipping does not apply to orders placed through McGill Market Place

QUALITY YOU CAN RELY ON

- Free ESI mass spec on every oligo
- Accurate molecular weight and single peak guaranteed
- Free QC documentation available online

Custom desalted DNA oligos

Synthesis scale	Price/base (tubes)	Price/base (96-/384-well plates)	Maximum length
25 nmol	C\$0.18	C\$0.12	60 bases
100 nmol	C\$0.39	C\$0.20	80 bases
Ultramer Oligos	C\$0.85	C\$0.45	200 bases

Purchase at www.idtdna.com. McGill purchasing recommends the use of an open PO. IDT offers a range of additional synthesis scales and custom nucleic acid products. If your project requires products not listed here, please inquire via the contact information below.

Other products available from IDT

- RNA Oligos, Ultramers and duplex
- Alt-R™ CRISPR-Cas9 and Alt-R™ CRISPR-Cpf1 Systems for genome editing
- xGen® Lockdown® Probes and Panels for NGS target enrichment
- PrimeTime® Gene Expression Master Mix and Probes for qPCR
- gBlocks® Gene Fragments for a wide variety of molecular biology applications
