

BACHELOR OF ARTS IN POPULATION AND GLOBAL HEALTH

Building a Healthier and
More Equitable World,
Locally and Globally.

Launching in 2026

WHAT IS POPULATION AND GLOBAL HEALTH?

Population and Global Health is the study of shared health challenges and solutions both locally and globally. It recognizes the impact of structural and social determinants of health and equity at the population level, and tackles global issues such as health care access, pandemic preparedness, and climate change resilience.

WHO IS THIS FOR?

Drawing on the interdisciplinary fields of public health and social sciences, among many others – the B.A. program empowers you with knowledge and skills to be transformative health leaders locally and globally. We seek students who are passionate about health equity, social justice, and tackling complex challenges.

If you're driven to create healthier communities and make meaningful change—locally and globally—this is the program for you.

WHY CHOOSE THIS PROGRAM?

Interdisciplinary scope

Explore health through the lens of sociology, political science, public health, economics, and more.

Real-world impact

Tackle urgent issues like climate change, displacement, life course challenges, pandemics, and health and social care inequities.

Hands-on learning

Opportunities for practicums and community engagement.

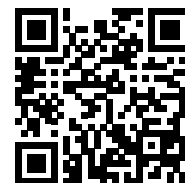

PROGRAM HIGHLIGHTS:

- Applications for Fall 2026 open in Fall 2025.
- No science prerequisites required.
- Core courses in Global Health, Ethics, Research Methods, and Knowledge Mobilization.

WHERE THIS CAN TAKE YOU:

Career pathways:

- Global Health Specialist
- Policy Analyst
- Health Communications Officer
- NGO/Non profit work
- Graduate studies (MSc. Public Health) or professional schools (Medicine)
