### About the Keynote Speaker:

Mario C. Raviglione has been Director of the Global TB Programme at the World Health Organization since 2003. He contributed to the development of the DOTS strategy in 1994, set up the global drug-resistance surveillance project and the global TB surveillance & monitoring system, and directed the development of the Stop TB Strategy in 2006 and the post-2015 Global TB Strategy in 2014.

# Global Health Programs: 2014-2015

## Education and Training

**\$367,000:** Total value of new travel award and fellowship opportunities established this year

**38** travel awards given to students in Faculty of Medicine, Fall 2014 to Fall 2015

**1<sup>st</sup>** Establishment of Summer Institute Infectious Diseases and Global Health in July 2015

**55** students from a variety of majors enrolled in the first Fundamentals of Global Health course

**6** high-quality, student led global health events sponsored by GHP

**800** total attendees in Global Health Seminar Series

**500+** international and Northern Quebec placements completed by allied-health students in the past four years

---

## Research

**20** Global health teams and centres & over 80 global health faculty at McGill whose work is now listed centrally on the Global Health Programs website.

**12** McGill global health teams supported by GHP with match by home department/institute

**4** thematic conferences (100+ people each) planned for the global health community by McGill researchers and supported by the Global Health Programs

---

## Strategy & Partnerships

**8** members of Executive Council, **6** members of International Advisory Board. Both established for Global Health Programs in 2014-2015. Strategic Plan 2015-2020 approved by Faculty of Medicine on April 2015.

**6** continents with McGill research projects in progress

**5** Key regions with multiple research and capacity building projects by McGill affiliates: India, Haiti, Peru, Northern Canada and South Africa
