

# GLOBAL HEALTH CONCENTRATION MCGILL INGRAM SCHOOL OF NURSING

## MISSION

The Global Health Concentration sets out to prepare nurses for the challenges of working with diverse populations in limited resource environments with a philosophy stressing the importance of understanding the inherent power dynamics, equity issues and ethical dilemmas that arise through this work. It is based on a belief that we have much to learn from one another. It provides students with global health content throughout their program of study, and students spend one semester taking clinical- and project-based courses in their final year in a global health placement site.

1 Ingram School of Nursing student with partners in Haiti.

## OUR PROGRAMS

The Ingram School of Nursing offers a Global Health Concentration at the Master's level for both bachelor **Nurse Entry** students and as well as for entry to practice bachelor prepared non-nurse students (**Direct Entry**).
