Taming the Tide: Stories from India

By: C. Bentley, V. Brombosz, S. Gabrielli, G. Lee, V. Nafade, L. Steele, M. Wall

"This paper examines an innovative sanitary pad manufacturing process in India that uses machines staffed by local women. We assess whether the intervention adequately addresses the economic and social challenges of menstrual hygiene management in rural India."

Reclaiming Childbirth: The Inuulitsivik Aboriginal Midwifery Program

By: P. Bidulka, R. Chuang, R. Barise, M. Cho, K. Mate

"Midwifery programs may act as a potential solution to address several relevant Sustainable Development Goals proposed by the United Nations: good health and well-being, reduced inequalities, and sustainable cities and communities (2). This case study examines the impact of culturally sensitive interventions in assisting Canada's most marginalized population."

Keeping Contraceptives on the Shelf: A Case Study on the Informed Push Model

By: F. Blackwell, J. He, B. Hodgin, G. Nakhle, I. Nandi, M. Okano, A. Qian

"In 2011 the Informed Push Model (IPM) was designed by Inrahaëth International and its partners to address the issue of contraceptive unavailability in urban areas of Senegal."
