Graduate and Postdoctoral Studies instructed us that this was too many concentrations in one single program, therefore we decided to reorganize our concentrations into 3 separate program designations. For purposes of reporting to the nursing professional order and to designate between the three distinct populations of students we have at the School in the Master's Program, we are reorganizing our current concentrations into separate degree titles with fewer concentrations in each degree. See the table on page 4 for the original versions with concentrations and the updated program designations we want to revise them to.</p> </div>

6.0 Revised Program Description (Maximum 150 words)

The Master of Science, Applied; Nursing (Non-Thesis), established in 1974, remains the only one of its kind in Canada. This three-year program is tailored to the university graduate with a general degree and no previous preparation in nursing or other health care professions. Candidates complete entry-to-practice preparation in nursing while also completing graduate-level studies in nursing. Students must first successfully complete a Qualifying Year (QY) of study before applying to the M.Sc.A. in Nursing. By the end of M.Sc.A. Year 1, students are eligible to practice as nursing externs during the summer break, in accordance with the regulations of the Ordre des infirmières et infirmiers du Québec (OIIQ) (i.e., the Quebec Order of Nurses – the provincial licensing board). Upon completion of M.Sc.A. Year II, graduates are eligible to write the OIIQ exams.
