Graduate and Postdoctoral Studies instructed us that this was too many concentrations in one single program, therefore we decided to reorganize our concentrations into 3 separate program designations. For purposes of reporting to the nursing professional order and to designate between the three distinct populations of students we have at the School in the Master's Program, we are reorganizing our current concentrations into separate degree titles with fewer concentrations in each degree. See the table on page 4 for the original versions with concentrations and the updated program designations we want to revise them to.</p>

6.0 Revised Program Description (Maximum 150 words)

This concentration prepares students for the challenges of working with diverse populations in limited-resource environments, while stressing the importance of understanding the inherent power dynamics, equity issues, and ethical dilemmas that arise through this work. It is based on a belief that we have much to learn from one another. The (M.Sc.A.); Advanced Nursing (Non-Thesis) - Global Health provides students with global health content throughout their program of study, and students spend one semester taking clinical- and project-based courses in their final year in a global health placement site. This concentration is supported by the Global Health Committee of the Ingram School of Nursing.
