Graduate and Postdoctoral Studies instructed us that this was too many concentrations in one single program, therefore we decided to reorganize our concentrations into 3 separate program designations. For purposes of reporting to the nursing professional order and to designate between the three distinct populations of students we have at the School in the Master's Program, we are reorganizing our current concentrations into separate degree titles with fewer concentrations in each degree. See the table on page 4 for the original versions with concentrations and the updated program designations we want to revise them to.</p> |

6.0 Revised Program Description (Maximum 150 words)

This concentration prepares a student for the multifaceted role of nurse practitioner in intermediate, acute, and critical care in neonatology. The nurse practitioner will acquire the necessary knowledge/understanding required to practice in a collaborative manner in providing services designed to deal with the health care needs and problems of neonates and their families in a variety of settings. The main focus is for the student to remember, understand, and apply critical thinking in all aspects of practice. The nurse practitioner is expected to function at various levels in educating families/co-workers, consultation, liaison, and managerial skills. These areas are addressed within the curriculum.
