Graduate and Postdoctoral Studies instructed us that this was too many concentrations in one single program, therefore we decided to reorganize our concentrations into 3 separate program designations. For purposes of reporting to the nursing professional order and to designate between the three distinct populations of students we have at the School in the Master's Program, we are reorganizing our current concentrations into separate degree titles with fewer concentrations in each degree. See the table on page 4 for the original versions with concentrations and the updated program designations we want to revise them to.</p>

6.0 Revised Program Description (Maximum 150 words)

This concentration was developed in order to train graduate-level nurses to take on this advanced practice role. Primary Care Nurse Practitioners assume responsibility for tasks related to physical assessment, diagnosis, and treatment within legally sanctioned, pre-determined conditions that have traditionally been exclusive to medical practice. The Primary Care concentration focuses on a wide range of acute and chronic health concerns across the life span.
