4.0 Rationale for new proposal

The Ingram School of Nursing is creating concentrations to replace each stream within the Master's of Science (Applied) program to better track students and reduce administrative overload. There are different required courses for each stream and different required numbers of credits for each stream in the Master's program. In practice we are running each stream as a separate program already. By resulting in the specification of a more precise degree name on the transcript, this program change will not only facilitate reporting and admissions, but it will also help students with bursary applications, post graduate licensure, doctoral studies and professionally.
