5.0 Rationale for revised program

We believe that the content from FMED500 is being taught in other courses and FMED504 is no longer necessary to be in our MSc program as a required course. In addition, we will be retiring FMED609 and FMED613, thus these courses will be taken out of the program. Both of these courses had low enrollment and were unpopular. Also, because our department keeps adding courses, we would like to enhance our complementary course section and delete our elective course section. In fact, we would like to add several courses to our complementary course section including some new courses that have been developed and we would also like to make some minor changes to the titles of some courses.
