- Clear description of the proposed methodology

- Specific, focused, and feasible research question(s) and objective(s)

- Quality of research proposal

- Research ability and potential (indicators)

Agency Reviewer Guidelines (50%)

Evaluating the application
conferences and meetings
volunteer work and/or civic engagement, chairing committees and/or organizing
participating in science and/or research promotion, community outreach,
managing projects

- teaching, mentoring, supervising and/or coaching
- supervising, colleagues, peers, students, and members of the community, such as:
  - Program requirements and courses pursued, course load
  - Duration of previous studies
  - Transcripts
  - Academic record, such as:
    - Scholarships, awards, and distinctions (amount, duration and prestige)
    - Beyond academia
    - Relevant experience and achievements obtained within and

Agency Reviewer Guidelines - 2 (50%)
Evaluating the application
Before you get started:

- What is your topic? Why is it important?
- What are your research questions? What is the relevance of your research questions?
- What are your hypotheses/theses?
- What is your research method? Why is it important?
- What is the feasibility of your research?
Be compelling, enthusiastic about your research project.

- Space out and highlight.
- Grammar and syntax - Know how to write and more importantly, how to read others read and read again.
- Absence of technical jargon.
- Have others read, read and read again.

Time = Coherence = Quality

Gold Standards of Successful Applications
Broad Training Expectations

Avoiding Addressing Potential Feasibility Issues – Resolutions

Incoherent Proposal Structure

Poor Narrative Flow

Identity things as they are – Lack Transparency

General Things to Avoid
Would You Fund It? Fellowship Consultation Session

McGill Writing Centre

Help with Writing
Progress will make you a better writer. Each review group consists of applicants from related disciplines—

about how a piece of writing can go from good to great—what you learn from reading their works-in-

emerging scholars learn in Graduate school. By reading peers' drafts, you get an opportunity to think

Learning to offer and receive generous and constructive criticism are among the most important skills

Fellowship Writing Groups (July-August 2020)
