**Definition of a Dependent Child**

A dependent child is defined as a member's natural or legally adopted child who is wholly dependent upon the member for support and is under the age of 21 years, or under 26 years if the dependent child is a full-time student.

The dependent child no longer qualifies for coverage if the child marries, assumes full-time employment, or reaches age 26.

---

**This is to confirm that the dependent child listed below has reached the age of 21 and is currently registered at an educational institution. I understand that I may periodically be asked to provide proof of study from the educational institution.**
