To include your dependent(s), you must do so when they arrive in Canada. Please note that we cannot retroactively add dependent(s) to your IHI plan for previous terms.

Types of coverage

- Single (only you)
- Dependent (you and your spouse or you and your dependent child)
- Family (you, your spouse and at least one dependent child or you and more than one dependent child)

Extent of coverage

The Health Benefits are provided on a 24-hour basis, 12 months a year, in Canada, and **only upon an emergency requiring a hospitalization outside of Canada**. Please refer to the Travel Benefit section on page 6 & 14 for more details.

Health Benefits cover:

- physical injury
- sickness
- pregnancy

- The medical condition must be certified by a physician.
- Charges related directly or indirectly to a pre-existing condition (including pregnancies) are payable up to a lifetime maximum of \$10,000 for each pre-existing condition.

Definition of pre-existing condition

A medical condition for which you or your dependent(s) have consulted a physician, been treated by a physician or been prescribed medication during the 3-month period (12-month period for travel benefit) preceding the effective date of insurance. Pregnancy is considered a pre-existing condition if delivery takes place within the first 30 weeks following initial registration in the plan, whether or not it was diagnosed during the 3-month period preceding the effective date of insurance. For insurance purposes, such a condition will cease to be considered a pre-existing condition on the date you or your dependent(s) have completed a period of 12 consecutive months following the effective date of insurance without any physician consultation, medical treatment or drug prescription for this condition. Even if you or your dependent(s) have not consulted a physician during the three-month period preceding your arrival in Canada, the medical condition is considered as a pre-existing condition by the Insurer if the state of health shows obviously that the condition existed at the time of arrival in Canada. Moreover, is also considered a pre-existing condition, any state of condition for which symptoms have been ignored or for which a medical advice has not been followed, or for which recommended investigation treatment, examination or intervention have not been done. The pre-existing condition applies in all cases of congenital disease, whether or not diagnosed.

The pre-existing condition will not apply if this plan replaces a similar coverage the student had with a group insurance plan offered by a recognized Canadian educational institution, for a period of 12 consecutive months immediately prior to the present coverage.

Important Notice
