

STUDY PLAN: INITIAL MENTORSHIP MEETING

Overview: The IPN requires that all new students meet with their assigned mentor in the first semester of their program. This meeting will be a chance to introduce yourselves to each other and have a brief discussion about what your research will be about. It is essential to have this meeting because it is your mentor who will chair all your major seminars.

Instructions:

- Please send an email directly to your mentor to set up a date and time to meet with one another. This can happen by phone or zoom.
- You will also have to upload the form on [myProgress](#) under the study plan milestone.

Please Note:

Not having this meeting will prevent you from moving forward with your other major milestones, and will be entered into the IPN and McGill record keeping system as a delay of your progress.
