

McGill Integrated Program in Neuroscience Presents:

# Post-Synaptic Careers: Life after a Neuroscience Degree

Discussion Series

November 14<sup>th</sup> 6:00 pm  
DeGrandpre Amphitheatre, MNI  
3801 Rue University

## ***What can one do after a degree in Neuroscience?***

*This discussion series will address this question through informal conversations with some successful non-academics with graduate degrees in neuroscience; the series will compliment IPN's Pathways and Connections, which is the academic equivalent of Post-Synaptic Careers. This is your chance to talk to those who were once where you are. Ask the guest speakers about the often difficult decision to leave academia and the important, but sometimes serendipitous, connections that led them to where they are now.*

### ***Dr. Mario Rivero-Huguet, Senior Science and Innovation Officer, British Consulate General***

*Mario is currently working for the British Consul General in Montreal as UK's Science and Innovation Officer. He possesses a Master's degree in Chemistry from the University of Leipzig in Germany, and a Doctor of Philosophy in Environmental Health from McGill University. Mario worked in Ottawa for Canada's International Development Research Centre as a specialist in Environmental Health, committed to action-oriented and community based research approaches as a sustainable solution to today's most pressing social, health and environmental issues. He has also worked as McGill Faculty lecturer and Senior Consultant for the Commission for Environmental Cooperation in North America.*

**DeGrandpre Amphitheatre, MNI (3801 Rue University), starting at 6:00 pm on Thursday, November 14<sup>th</sup>, 2013.**

**Please RSVP to [Joe Makkerh](mailto:joe.makkerh@mcgill.ca)  
([joe.makkerh@mcgill.ca](mailto:joe.makkerh@mcgill.ca))**

*Details about future sessions of Post-Synapse will be sent out as soon as they become available.*
