

The REALTRAPS Carrel

Your own portable private office!

..PRIVACY AND QUIETUDE..

"I'm 'the voice' for many major corporations, and I do it all from behind my Carrel here in Nashville. I like the Carrel because my voice sounds natural in it, versus some of the over-deadening products out there." --Tom Glynn, Voice Actor

THE REALTRAPS CARREL

Also see our related product the [REALTRAPS PVB](#).

The REALTRAPS Carrel is the ideal desk-top solution for capturing clear, dry sounding voice-over recordings in almost any space. It's also great for creating a totally private noise-free environment for busy offices, libraries, study rooms, telephone call centers, and testing labs. Unlike typical carrels that offer only isolation, the REALTRAPS Carrel also absorbs ambient sounds making the enclosed space even quieter.

The REALTRAPS Carrel is similar to our [Portable Vocal Booth](#), but adds a third 2 by 2 foot hinged panel [Metric: 61 x 61 x 3.5 cm] instead of the PVB's microphone stand mounting base. The expanded size creates an even larger protected area than the PVB. This carrel is solidly constructed (12 pounds), and perfectly stable, letting it free-stand nicely on a table or any flat surface. The bottom is covered with felt to prevent scratching.

One of the three absorbing panels can be easily removed, letting you use the REALTRAPS Carrel as a Portable Vocal Booth on a microphone stand. This requires purchasing the metal mic stand mounting hardware for our Portable Vocal Booth, sold separately just for this purpose.

Available fabric colors are black, white, wheat, and gray, though the metal frame is available in black only.

15 Oronoque Trail, Shelton, CT 06484 [866-RealTraps \(866-732-5872\)](tel:866-732-5872) Weekday hours: 10-5 Eastern time
