

Index: St-Lawrence River Wetland Maps and Data 1990-1991

The St-Lawrence river wetland maps (1990-1991) are produced by Centre-St-Laurent. The digital maps and data are available in Shape, TIFF, and ESRI Grid formats. Individual digital maps and data files are identified by the name and year. When ordering the files indicate the map name, year, and file type (ie. Boucherville 1990, shape format)

Data is available at the Walter Hitschfeld Geographic Information Centre. Data can ONLY be used by members of the McGill University Community, for teaching and research purposes.
