MSSI Scenario Building Exercise

Agricultural sustainability over the next 20 years

Tuesday October 2, 2018

10:30 am — 12:30 pm

Macdonald Campus

The McGill Sustainability Systems Initiative invites you to a scenario building exercise led by Professor Elena Bennett. The exercise will follow the STEEP (social, technological, environmental, economic, political) approach to envisage agricultural sustainability over the next two decades. This event will offer participants valuable experience using a tool that can be applied in research, stakeholder engagement and student training. The two-hour exercise will be followed by lunch and conversation.

*Space is limited, and priority will be given to McGill faculty. McGill postdocs and graduate students are welcome to register and will be invited to attend if space is available. Please **RSVP by September 25th** at: <https://mcgill.ca/mssi/events>. The MSSI can provide shuttle coupons for those travelling from the downtown campus.*
