

COURSE SELECTION

The master’s program in Mathematics and Statistics requires the completion of minimum 21 credits of complementary graduate courses.

The Ph.D. program in Mathematics and Statistics requires the completion of minimum 21 credits of complementary graduate courses, with at least two courses at the 600-level or above. All credits of complementary courses should be taken before the end of PhD 3. In exceptional circumstances, an extension can be granted by the student’s Advisory Committee.

The choice of courses to fulfill these requirements must be prior approved by the student’s Advisory Committee. The Department recommends that students take complementary courses in at least three different areas of Mathematics and Statistics.

Students who wish to take more than 8 credits of complementary courses from outside the Department should request approval from the Graduate Program Director.
