Ipek Tureli (Engineering)

The Committee held a meeting by Zoom to decide on the timeline for the 2023 elections.

It decided on a nominating period to end on March 27th, followed by the election period from April 5th to April 17th.

Committee members actively sought to recruit candidates for all electable positions.

By the March 27 deadline, we received 12 nominations for the 5 Council seats that will become vacant. This is substantially in excess of the constitutionally mandated minimum of six candidates.

Two nominations were received for the President-Elect and the VP-Communications positions. A single nomination was received for each of the other executive offices.

Elections will be held from April 5th-17th on Omnivox and results will be reported at the AGM on April 20th.
