

ACUTE PURULENT PERICARDITIS.

HEART.

9

Ref.: M.G.H. 337.97  
Presented by Dr. Osler.

E.129

From a middle-aged woman. Pericardium contained a pint of laudable pus.

Note: The greatly enlarged pericardial sac and the reversed triangular area of cardiac dulness with apex superiorly, which would be produced by the effusion.
