The Department of Neurology and Neurosurgery is currently inviting applications for a full-time position. The successful applicant will hold an academic appointment as a member of the Contract Academic Staff at the full-time Assistant or Associate Professor (Clinical) level (non-tenure track). This will be a three-year, renewable appointment. McGill is Canada’s leading research-intensive university with students from over 140 countries. The university is located in Montreal, a cosmopolitan city with great cultural and linguistic diversity.

The successful candidate will be expected to conduct vigorous cutting-edge, externally funded, independent research augmenting our existing efforts in the area of Parkinson’s disease (PD) and Movement disorders. We are particularly interested in developing novel animal models of PD such as those using marmosets. Institutional support would be available to candidates with expertise in these areas. The successful candidate will also be expected to supervise graduate students and to contribute to teaching related to McGill’s academic mission. The MNI is integrated with the Montreal Neurological Hospital, with clinics specialized in neurology and neurosurgery, including a large movement disorders clinic engaged in clinical trials and research. This provides a unique environment for studying fundamental and applied neuroscience.

Candidate must hold or be eligible for licensure as a neurologist in the province of Quebec. Remuneration will be according to the Quebec health care fee schedule.

Clinician-scientists with MD-PhD or equivalent research-intensive training would be particularly encouraged to apply. The successful applicant will have advanced training and the demonstrated capacity to excel in academic neurology, including specialized clinical expertise. Successful candidate will provide excellent clinical teaching and supervision to residents and medical students, and expected to develop innovative, externally funded independent research to pursue scholarly activities in advancing research in the area of Parkinson’s disease and movement disorders.

The McGill University Health Centre includes major McGill University-affiliated teaching hospitals at several sites in downtown Montreal. Neurologists and neurologist-scientists provide tertiary in-patient and out-patient neurological care, engage in a wide range of clinical and basic neuroscience research, and lead strong clinical neuroscience teaching programs in undergraduate and postgraduate medicine at the Montreal Neurological Hospital and Institute, Montreal General Hospital, and McGill University.

Please submit your application at the following website: https://www.mcgill.ca/medicine-academic/positionsavailable. Interested individuals should send (1) a cover letter, curriculum vitae (as one pdf document), (2) statement of research and of teaching interests and experience, list of publications and three recent research articles, (as one pdf document) and (3) the names and contact information of three referees, within 30 days of publication of this advertisement.

*McGill University is committed to diversity and equity in employment. It welcomes applications from: women,*
Aboriginal persons, persons with disabilities, ethnic minorities, persons of minority sexual orientation or gender identity, visible minorities, and others who may contribute to diversification.

All qualified applicants are encouraged to apply; however, in accordance with Canadian immigration requirements, Canadians and permanent residents will be given priority.
