Variations in Radiation Oncology practice

Emilie Soisson, PhD, FCCPM

University of Vermont Medical Center
Burlington, Vermont

As a former member for the clinical medical physics faculty, I am returning to McGill to share some thoughts on variations in practice in radiation oncology and medical physics. The first part of the talk will focus more generally on my experience assimilating into my new position at the University of Vermont Medical Center. The second part of the talk will look at patterns in the use of image guided radiation therapy including and in depth look at imaging practices at the MUHC.
