

## ***"Reinforced adaptive MRI-guided RT"***

**Teodor Stanescu, PhD, MCCPM**

Radiation Medicine Program, Princess Margaret Cancer Centre  
Radiation Oncology / Mechanical & Industrial Engineering, University of Toronto  
Guided Therapeutics, Techna Institute, University Health Network  
Toronto, Ontario

Emerging technologies in MRI-guided RT require the re-thinking of RT processes as well the R&D and clinical deployment of new tools to enhance the efficacy of on-line adaptive treatment sessions. The presentation will cover the latest developments with respect to MR-guided activities as applied to upper GI sites (i.e., liver and pancreas) at Princess Margaret.
