Machine Learning Basics Workshop

Martin Vallières will be giving a presentation about "Machine learning basics" as part of our student workshop series from 2-4pm on February 17 in room D02.4250.

COMP

COMP will take place in Ottawa this year from July 12-15. Even though abstract submission details have not yet been released, we are looking into reserving accommodation for students attending COMP earlier than usual due to Canada Day celebrations. If you are planning on

submitting to/attending COMP, please let André know by February 10.

CREATE Linear Accelerator Workshop

Laval University is hosting a linear accelerator workshop on March 16-17 in Quebec City. The course will be led by Dr. Luc Gingras, and will include theory classes and demonstrations in a teaching dedicated Varian TrueBeam linac bunker. Please note that instruction will be primarily in French, but should still be accessible for those with a basic understanding of French. There are approximately 5 spots available for McGill students- please let Susannah know by February 10 if you are interested in attending.
