

Introducing Simulation Into Your Curriculum: From Principles to Practice

TARGET AUDIENCE

Educators who frequently develop and/or deliver simulation-based educational activities.

WORKSHOP GOALS

This one-day workshop is designed for educators with a significant engagement in simulation-based education. The program will provide participants with a foundational background of how people learn, the basic theoretical background behind simulation-based education, and the evidence for the use of simulation-based education in practice. Participants will learn how to implement deliberate practice into their educational activities as well as improve their debriefing skills (and how to support their colleagues on how to do the same). Co-learning with other leaders in simulation-based education will allow for networking and creating shared opportunities across the McGill community.

By the end of this workshop, the participant will be able to:

- Describe how people learn and the added value of simulation;
- Outline the principles of effective debriefing for simulation-based education;
- Apply different methods of debriefing and describe the advantages / disadvantages of each approach;
- Discuss a variety of opportunities and approaches for teaching and learning with simulation and outline best practices in each context.

This is an Accredited Simulation Activity (Section 3) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada. You may claim a maximum of 7.5 hours for this activity.

STEINBERG
CENTRE FOR SIMULATION AND
INTERACTIVE LEARNING

WHEN

January 16, 2023 | 8:30 a.m. to 4:30 p.m.

WHERE

Steinberg Centre for Simulation and Interactive Learning
3575 Parc Avenue, Suite 5640, Montreal, QC H2X 3P9
