MESSAGE FROM YOUR MIMM CHAIRS

Happy Fall everyone!

The leaves are beginning to change, and while our semester is off to a great start, it is clear that the second wave has arrived in Montreal. Red zones, single address gatherings and mobility restrictions are upon us, as case numbers are again rising. Fortunately for the Department, there is little direct impact on our operations at this stage, and we will continue to deliver our teaching remotely, and conduct our research activates in a safe and secure fashion. This week we received official word from the University that the Winter semester will also be primarily remote. Even if we are allowed to open some in-person activities, it will be necessary to offer remote learning opportunities for

Monat C, Cousineau B. The circle to lariat ratio of the LI.LtrB group II intron from Lactococcus lactis is greatly influenced by a variety of

students who cannot come to Montreal.

We recognize this shift will entail more hard work and sacrifice on everyone's part, but we have already started planning, taking our experiences from this Fall into consideration. We would love to hear any suggestions you have on how to deliver the best possible educational experience in the winter semester, and what resources might help in this effort.

Stay safe everyone!

Don and Sam

AMR Awareness Video Competition

In honor of World Antimicrobial Awareness Week (November 18-24 2020), the AMR Centre at McGill and MIMM are inviting McGill undergraduate students to create a short video highlighting the causes and threat of AMR, and the actions citizens can take to tackle this problem. The video should inform and sensitize citizens about the dangers of AMR and inspire them to help curb this global threat. Get creative and win prizes.
