

EMERGENCY RESPONSE PROCEDURES AT THE MNI

MEDICAL ATTENTION

Minor injuries

First aid kits should be available to all personnel and a notice indicating the location should be posted in each laboratory. This notice should include the names of individuals who have taken first aid or medical training, as well as emergency numbers. First aid kits must be inspected quarterly (January, April, July, October) and kept up to date. Fill in [inspection checklist](#): and [reorder supplies](#). It is not necessary to have a first aid kit in every laboratory room as long as a kit is accessible 24/7 nearby and the location is posted.

Report work accidents to EHS <https://www.mcgill.ca/ehs/forms/forms/accident-and-incident-report>.

Ambulatory, but requiring medical attention

- Go to a hospital with an Emergency Department (*e.g.*, the Montreal General Hospital, not the MNH). Be accompanied by a co-worker.

Emergency involving conscious, non-ambulatory individual inside the building

- Dial 55555 from a Neuro landline and explain the emergency.
- Give precise location (Building, Pavilion, Floor, Room number), your name and a phone number to contact you.
- The agent will triage and decide next steps.

Outside the building

- Call 911 and then 514-398-3000 to inform McGill campus security.

Medical emergency for unconscious individual (CODE BLUE) inside the building

- Dial 55555 from a Neuro landline and state Code Blue.
- Give precise location (Building, Pavilion, Floor, Room number), your name and a phone number to contact you.
- The Code Blue team from the Neuro will respond.
- Make sure that someone will direct the Code Blue team to the appropriate location.

Post this page in a visible location with the notice of first-aid kit location and list of first responders
