

the neuro

# what matters in life? grey matters

## **There are 15 million reasons to give to The Neuro.**

About 50% of Canadians or 15 million people, will eventually experience the devastation of a neurological disorder, whether it's a tumour, dementia, Parkinson's disease or multiple sclerosis. As a world-leading neuroscience research centre and hospital, we're making strides in eradicating these terrible diseases and dramatically improving the lives of young and old.

Your donations propel our research into the mind-boggling potential of the brain. You allow us to invest in critically needed technology and provide our trademark clinical care.
