

The laboratory of **Professor Terence Coderre**,
a core laboratory in McGill's
Alan Edwards Centre for Research on Pain

has a position open for a
Postdoctoral Fellow.

Work on exciting projects such as:

- Nuclear mGluR5's role in persistent pain
- Role of PKM ζ in the maintenance of nociceptive sensitization
- How microvascular dysfunction contributes to CRPS and neuropathic pain
- Development of novel topical analgesics for localized chronic pain

Learn techniques in behavioral nociceptive testing, neuropharmacology, cellular imaging, protein assays, molecular biology.

Candidate must have obtained a PhD or equivalent within 4 years.
