

Pathology Scientific Lecture

Friday, April 26, 2019 1:30 pm

Tumor infiltrating lymphocytes (TILs) in melanoma

Ayman Al Habeeb, MD, FRCPC

Pathologist, Department of Laboratory Medicine and Genetics, Trillium Health Partners, Mississauga, ON, Canada.

Assistant Professor, Laboratory Medicine & Pathobiology, University of Toronto, Toronto, ON, Canada

Pathologist, Department of Pathology, Sunnybrook Health Sciences Centre, Toronto, ON, Canada

Dr. Al Habeeb obtained his MD degree from King Saud University in Riyadh in 1999. Following his anatomical pathology residency at McMaster University (2007), he completed a dermatopathology fellowship for one year at University of Toronto. He started as a full time dermatopathologist at University Health Network in 2008 and stayed in that role for almost 10 years until he moved to Trillium Health Partners (THP) in 2018. Dr. Al Habeeb has authored over 40 peer-reviewed publications, invited reviews and book chapters. He has a strong dedication to education and has taught numerous residents and dermatopathology fellows. Dr. Al Habeeb also serves as the laboratory and reporting physician lead for the new hospital information system at THP.
