

Dr. Benaroya's opening remarks

- ❖ As the Vice-Dean Health Affairs in the Faculty of Medicine, I am aware of the progresses made in Pathology on education and research, congratulations to team.
- ❖ Three challenges all Chairs of Departments face: space, money and recruitment. Your guys did a fantastic job. I will make sure to have Dr. Gao do a presentation at the faculty council meeting, to share your success
- ❖ There will be a Faculty Council meeting on Feb. 28th with Dr. Joshi to question and reflect openly to further integration of activities within McGill.
- ❖ Services are no longer silo based but are much more territorial and population based.
- ❖ Dean Eidelman renewed for a second term.
- ❖ Retreats take you away from daily duties and are important to think more deeply and reflect on the plans to move the department forward.
