New paradigms in the cytologic and histologic assessment of follicular-patterned thyroid tumors

William Faquin, M.D., Ph.D.
Professor of Pathology, Harvard Medical School
Chief of Otolaryngologic Pathology, Massachusetts Eye and Ear
Subspecialist in Head & Neck Pathology & Cytopathology, Massachusetts General Hospital, Boston, MA

Dr. Faquin is the Chief of Otolaryngologic Pathology at the Massachusetts Eye and Ear and a subspecialist in Head and Neck Pathology & Cytopathology at the Massachusetts General Hospital in Boston. He is Professor of Pathology at Harvard Medical School, and is recognized for his contributions to the study of thyroid, salivary gland, and HPV-related cancers of the head and neck. He has authored over 200 peer-reviewed publications, and has co-authored books on head and neck cytohistology, salivary gland cytopathology, and thyroid cytopathology. Dr. Faquin is a co-author of the Bethesda System for Reporting Thyroid Cytopathology, co-chair of the College of American Pathologists Evidence-Based Guidelines Committee for the testing of head and neck squamous cell carcinomas for high-risk HPV, and co-chair of the Milan System for Reporting Salivary Gland Cytopathology sponsored by the ASC and IAC.
