

Academic Half-Day Seminar (Virtual)

Dr. Joseph Misdraji, MD

Professor of Pathology
Yale School of Medicine

Dr. Joseph Misdraji is Professor of Pathology at Yale Medical School and Associate Pathologist at Yale New Haven Hospital. He trained at Massachusetts General Hospital where he completed AP/CP training and fellowship training in cytopathology. He was on the staff at Massachusetts General Hospital, where he signed out GI and cytology, for over 20 years. During his tenure there, he was co-director and director of Gastrointestinal Pathology, and was director of Histopathology Operations for several years. He currently signs out gastrointestinal and hepatic pathology at Yale New Haven Hospital. He is also director of the Surgical pathology, Histology, and Immunohistochemistry labs. Dr. Misdraji has published papers and book chapters in a wide range of GI and hepatic pathology topics and has lectured both nationally and internationally on GI pathology and hepatic pathology. He is known internationally for his work in appendiceal neoplasia, and in particular, his introduction of the term *low grade appendiceal mucinous neoplasm* into the lexicon of appendiceal tumor nomenclature. He was the author of the recent WHO chapters on appendix tumors and pseudomyxoma peritonei.

“Appendiceal mucinous neoplasms and pseudomyxoma peritonei: Where are we today?”

Date | Friday May 17th, 2024

Time | 1-2 PM (talk with Q&A) | 3-4 PM (slide seminar for trainees)
