À tous les membres du Département de Pédiatrie, au nom de la Directrice, Dre Beth Foster

Cette semaine, La RD souligne les contributions dévouées du **Dr Charles Rohlicek** au cours de ses plus de 30 années en tant que cardiologue à L'HME. Charles a pris sa retraite en décembre 2023 et a été un pilier de la division de cardiologie. Non seulement il a prodigué d'excellents soins à d'innombrables patients et familles, il a aussi dirigé un laboratoire pendant de nombreuses années, a participé à l'ancien comité de gestion de l'Institut de recherche de L'HME en tant que membre, et a enseigné le système cardiovasculaire à d'innombrables étudiants en médecine et résidents (y compris moi !). Sa présence à l'hôpital nous manquera beaucoup, mais il mérite certainement de se reposer.

Joignez-vous à moi pour féliciter Charles à l'occasion de sa retraite et le remercier pour ses nombreuses années de service dévoué.

Beth Foster
Professeur de pédiatrie
Directrice du département de pédiatrie de l'Université McGill
Pédiatre en chef, Hôpital de Montréal pour enfants du CUSM
Chaire Harvey Guyda en pédiatrie

To all members of the Department of Pediatrics on behalf of the Chair/Chief, Dr. Beth Foster

This week's DA highlights the dedicated contributions of **Dr. Charles Rohlicek** over the course of his more than 30 years as a cardiologist at the MCH. Charles retired in Dec. 2023 and has been a pillar of the Division of Cardiology. Not only did he provide great care to countless patients and families, but he ran a lab for many years, participated as a member of the old MCH Research Institute Management Committee, and taught innumerable medical students and residents (including me!) about the cardiovascular system. His presence in the hospital will be greatly missed, but he certainly deserves a rest.

Please join me in congratulating Charles on his retirement and in thanking him for his many years of devoted service.

Beth Foster
Professor of Pediatrics
Chair, Department of Pediatrics, McGill University
Pediatrician-in-chief, Montréal Children's Hospital of the MUHC
Harvey Guyda Chair in Pediatrics

The respiratory therapist on the transport team was **Tasha Daniel** and the PICU nurse was **Caroline Braud**. They worked tirelessly with Dr. Souza Dias, until 5 hours past their shift's

end, to stabilize the patient and safely transport him to Ste Justine. At the same time, the patient with bronchiolitis was also managed safely.

This is the type of dedicated care for which the MCH is known and highlights the exceptional quality of our residents and teams.

Please join me in congratulating Vitoria, Tasha and Caroline!

Beth Foster

Professor of Pediatrics

Chair, Department of Pediatrics, McGill University

Pediatrician-in-chief, Montréal Children's Hospital of the MUHC

Harvey Guyda Chair in Pediatrics
