18th Annual Steinberg Child Development Lectureship

Gene-Environment Interplay and the Biology of Misfortune

W. Thomas Boyce, M.D.
Distinguished Professor of Pediatrics and Psychiatry, Emeritus, University of California, San Francisco
Head, Division of Developmental-Behavioral Pediatrics, University of California, San Francisco

le 21 avril 2021 12 – 13h | April 21, 2021 12:00 – 1:00 pm
Grand Rounds will take place via Zoom
Zoom link: https://mcgill.zoom.us/j/93580867208

Educational Objectives:

1. Explain the neurobiological consequences of exposures to toxic stress
2. Understand the social stratification of stress-related morbidities
3. Recognize the origins and implications of individual differences in stress reactivity
4. Recount the role of the epigenome in the genesis of such difference
