Two in one: Novel treatments for an asthmatic Cystic Fibrosis patient

par/by Dr. Larry C. Lands MD, PhD
Director, Pediatric Respiratory Medicine, MUHC and

Sophie Vallee-Smejda (Respiratory Nurse Practitioner)
Pediatric Respiratory Medicine, MUHC

le 8 décembre 2021, 12h-13h
December 8, 2021, 12pm-1pm

Educational Objectives
1. Understand the role and therapeutic potential of mutation-based CFTR modulator therapies
2. Differentiate difficult to treat asthma from severe asthma
3. Select asthmatic patients for treatment with biologics
