

Pediatric Radiology Residency

One year of residency is available in Clinical Pediatric Radiology. The 1-year program is accredited, by The Royal College of Physicians and Surgeons of Canada. The training program is designed to introduce the resident to all modalities by means of closely supervised exposure to plain radiographs, digital fluoroscopy, ultrasound and Doppler studies, nuclear medicine including SPECT, computed tomography, magnetic resonance imaging with basic spectroscopy, as well as angiography and interventional studies.

The resident will be familiarized with procedures, guidelines and equipment used in sedation and monitoring of infants and children. At the end of the one-year program, the resident will have received full training in all aspects of Clinical Pediatric Radiology. Protected time, up to one month, is devoted to research (usually clinical research) in the first year.

Royal College certification in Pediatric Radiology requires all of the following

1. Royal College certification in Diagnostic Radiology
2. Successful completion of a 1-year Royal College accredited program in Pediatric Radiology
3. Successful completion of the certification examination in Pediatric Radiology

Only candidates certified by the Royal College of Physicians and Surgeons of Canada in Diagnostic Radiology may be eligible for certification in Pediatric Radiology.
