

POSTDOCTORAL POSITION at McGill University

Location: Montreal, QC, Canada

Start date: April 2018 or as soon as possible

Duration: 1 year, with the possibility of an extension for up to 4 years

The laboratory of Dr. Barbara Hales in the Department of Pharmacology and Therapeutics, Faculty of Medicine, McGill University is currently seeking a talented Postdoctoral Fellow to join an exciting, CIHR-funded, research project investigating the effects of exposure to a family of flame retardant chemicals with activity as endocrine disruptors on male and female reproductive health.

Qualified candidates should be self-driven and highly motivated individuals with an established track record of success, including first-author publications. Applicants must have completed a Ph.D. in a relevant discipline within the last two years and should have experience with molecular and cellular biology techniques, bioinformatics, cell signaling, toxicology, the culture of cell lines and organs, and the use of animal models. In addition, they should have primary publications in highly-ranked English language scientific journals, fluency in written and spoken English, the ability to work cooperatively with members of the lab, and strong organizational skills. The salary for this position will be commensurate with experience. Canadian citizens and permanent residents will be given priority.

For prompt consideration, please email the following items to Ms. Elise Boivin-Ford (elise.boivin-ford@mcgill.ca):

- Cover letter (including a statement of research interests and prior experience in related research)
- CV with bibliography
- PDF of recent publications or manuscripts ready for submission
- Contact information for 3 references
